

“The Kansas Disability and Health Program is partnering with Oral Health Kansas to develop resources and a training to improve oral health for people with mobility and/or physical limitations, such as paralysis, tremors or weakness. This will be a new training in addition to the one we have for people with IDD.

We are currently recruiting people to serve on an advisory committee to assist in identifying existing resources and providing input for new resources and training content. We have openings for both staff and consumers. The advisory committee would require limited time, meeting twice between now and December and reviewing a few documents via email. The first meeting would be a 90-minute in person meeting in Topeka followed later by a 60-minute tele/video conference. We could reimburse for mileage to the meeting.”
